Implementation Summary

The repository contains:

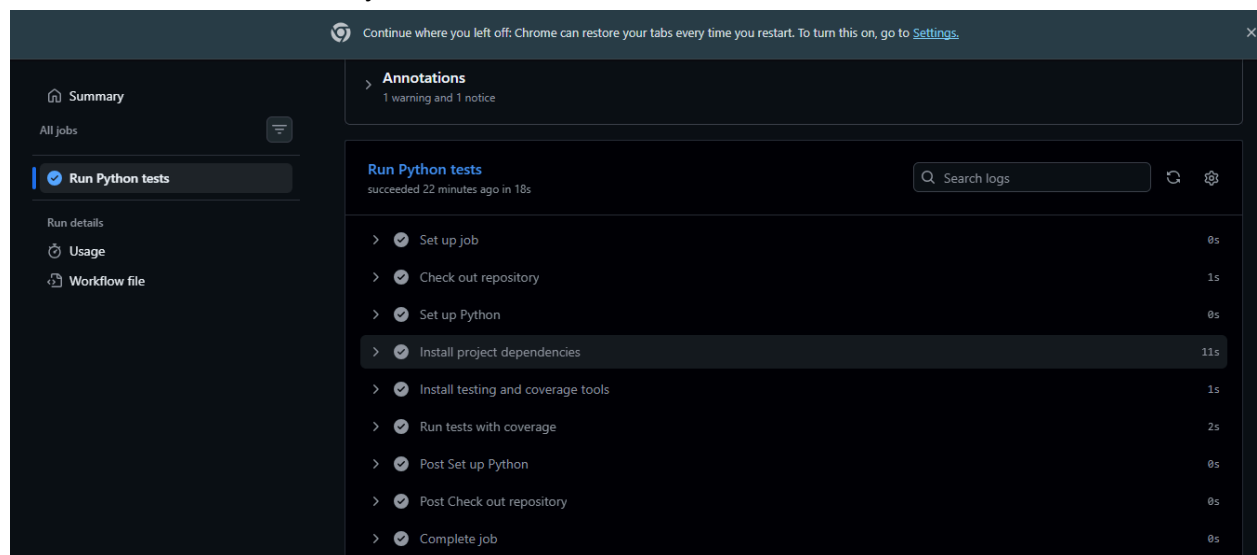

- The original Python application in `src`
- The original test suite in `tests`
- `python-tests.yml`
- `python-coverage.yml`
- Required dependency configuration in `requirements.txt`
- Commits containing the completed GitHub Actions implementation

The workflows are configured to run when a pull request targets the main branch.

Coverage Workflow

The coverage workflow:

- Runs on pull requests targeting `main`
- Sets up Python 3.13
- Installs the project dependencies

- Installs **pytest** and **pytest-cov**
- Generates coverage for the **src** directory
- Publishes coverage information to the pull request
- Enforces a minimum coverage threshold of 50%
- Fails if coverage is below 50%
